

Call & Response MIDI (v1.0.5)

Intelligent Algorithmic Phrase Generator & 303-Style Sequencer

Viral Samples • Formats: VST3, Audio Unit (AU), Standalone • Platforms: macOS (Apple Silicon & Intel) & Windows (64-bit)

Attributions & Creative Credits

Call & Response MIDI stands on the shoulders of brilliant music technology pioneers:

- **Nordl3:** Heartfelt attribution and credit to **Nordl3** for the original project concept and foundational algorithmic principles of dual-phrase call-and-response phrase generation.
- **SideBrain:** Sincere gratitude and attribution to **SideBrain** for his visionary Max for Live device implementation and creative workflow concepts that popularized call-and-response MIDI composition for modern electronic music producers.

Viral Samples Evolution: We expanded these core concepts into a high-performance, cross-platform C++/JUCE instrument featuring a resonant analog 303 synth, interactive 2D piano roll note editing, dynamic scale transposition, fast preset slots, multi-state undo/redo, vector lock icons, and universal Apple Silicon/Intel and Windows 64-bit optimization.

Feature Summary

Feature	Description
Dual-Lane Generative Engine	Algorithmic Call and Response phrases with 35 Scales, 40 Styles, 38 Response Strategies, and 24 Motif hooks.
Dynamic Scale Transposition	Automatically translates existing notes to new keys/scales while preserving harmonic interval relationships.
Interactive 2D Piano Roll	Drag notes horizontally (step move) or vertically (pitch transpose), double-click to add/delete, resize note gate handles.
3-Way Split Views	Instant switching between BOTH (stacked step grids + piano roll), CALL, and RESP focused views.
Built-in 303 Acid Synth	Analog-modelled oscillator, squelchy resonant low-pass filter, and snappy decay for immediate standalone auditioning.
Rapid Preset Slots (A–H)	Cmd+Click to save current state; Double-Click to load. Visual occupancy dots and right-click menus.
Undo/Redo & Panic	24-step multi-level undo/redo buffer and global MIDI All-Notes-Off panic button.
Parameter Lock Icons	Vector padlock toggles next to Style, Strategy, Key/Scale, and Motif to protect parameters during Dice rolls.
9 Mutation Modes	Targeted mutation: Rhythm, Pitch, Articulation, Ending, Motif, Whole, Response, Call, or Linked.
MIDI Drag & Drop	Export directly to DAW arrangements with Combined, Call Only, Response Only, or Layered multi-channel routing.
Cross-Platform Support	Native 64-bit performance on macOS (Apple Silicon M1–M4 & Intel) and Windows 10/11 (64-bit).

Installation & Setup

macOS

Run the included `Call & Response MIDI v1.0.5 Installer.pkg` to install:

- `/Library/Audio/Plug-Ins/VST3/Call & Response MIDI.vst3` (VST3)
- `/Library/Audio/Plug-Ins/Components/Call & Response MIDI.component` (Audio Unit)
- `/Library/Audio/Documentation/Viral Samples/Call & Response MIDI/` (Documentation)

The installer automatically strips quarantine attributes (`xattr -cr`), verifies code signatures, sets permissions, and refreshes the macOS audio component cache.

Windows

Run `Call & Response MIDI v1.0.5 Windows Setup.exe` (built via Inno Setup script `installer/windows/installer.iss`, `build_windows.bat`, or GitHub Actions CI):

- `C:\Program Files\Common Files\VST3\Call & Response MIDI.vst3` (VST3 64-bit)
- `C:\Program Files\Viral Samples\Call & Response MIDI\Call & Response MIDI.exe` (Standalone)
- `C:\Program Files\Viral Samples\Call & Response MIDI\Documentation\` (User Manuals & Read Me)

Quick Keyboard Reference

Action	Shortcut / Gesture
Save Preset to Slot A–H	<code>Cmd+Click</code> (or Shift/Alt/Ctrl+Click) on slot button
Load Preset from Slot A–H	<code>Double-Click</code> on slot button
Add / Delete Note in Piano Roll	<code>Double-Click</code> on empty grid cell or existing note
Move Note Pitch & Step	Click note center and drag vertically (pitch) or horizontally (step)
Adjust Note Duration	Hover over note right edge ( cursor) and drag horizontally
Toggle Accent / Slide	<code>Right-Click</code> note for Accent (orange badge); <code>Alt-Click</code> for Slide (cyan line)
Lock / Unlock Parameter	Click vector padlock icon next to parameter
